Swelex becomes Nordic distributor for AC Tasarım

Strengthening EMC/EMI offering for defense and industrial markets

Swelex is pleased to announce a new partnership with AC Tasarım A.Ş., a leading Turkish manufacturer of advanced EMI/EMC solutions. Through this cooperation, Swelex will act as the official Nordic distributor for AC Tasarım's product portfolio.

Founded in 2003, AC Tasarım specializes in:

- Flexible EMI/EMC braided shields and grounding braids (copper, tinned, nickel-plated)
- Polyester, meta-aramid, and Nomex sleeves for thermal and fire protection
- Flat copper busbars and custom shielding components
- Products manufactured in compliance with AA-59569, VG 96936-10, and supported by AS/EN 9100 quality standards
- Certified and registered under AS/EN 9100, JOSCAR, and NATO NSN systems

With this partnership, Swelex will:

- Represent AC Tasarım as the Nordic point of contact and regional distributor
- Provide local technical support, logistics, and stock availability for faster delivery
- Integrate AC Tasarım's certified EMC/EMI products into Swelex's broader portfolio for industrial and defense applications

"We are very pleased to collaborate with AC Tasarım and to offer their high-quality EMI and grounding solutions to our Nordic customers," says Tommy Ahlsved Managing Director, Swelex. "Their certified manufacturing and technical expertise fit perfectly with our ambition to strengthen Swelex's position in advanced industrial and defense segments."

"Swelex has a strong presence in the Nordic region and deep experience within the industrial and defense sectors," says Arda Öngören, Managing Partner at AC Tasarım. "We are looking forward to developing this partnership and expanding our global reach together."

About Swelex

Swelex AB is a Nordic distributor and solution provider specializing in components and systems for industrial, defense, and electromobility applications. The company offers tailored solutions combining connectivity, power, thermal management, and shielding technologies.

About AC Tasarım A.Ş.

Founded in 2003 and based in Ankara, Turkey, AC Tasarım designs and manufactures professional EMI/EMC solutions such as braided shields, grounding products, and shielding components for the defense, aerospace, and industrial sectors.
